# Tools for the Indecisive

## Description

      This is a simple set of tools that provide activity suggestions from an API for the hesitant decision-maker, and the ability to store them or mark them as completed. It has three main parts: the random activity suggestor, a list of current saved activities, and a list of completed or attempted activities. The random activity selector button provides a random suggestion. These suggestions can be saved in a "saved" list displayed on the main page. The "saved" list displays the first 5 saved item names only, and can be clicked to bring the user to a full display of all suggestions and their respective attributes. A third list contains completed or attempted activities moved from the "saved" list. When an activity is moved, a user can add a Description of their experience, and attach any images they have. This list is also displayed with minimal information on the home page. The user can click this section as well to see the full view.

## MVP

- Navbar contains: Home, Saved Activities, Activity Log
- Activity suggestion provider
    - New Suggestion button
    - Save to List button
- List of Saved Activities
    - Home page- max of 5, titles only
    - "Show All" button brings the user to the Saved view
        - Here, the user can see Activity, Category, and Accessibility attributes of each item saved on the list
    - Each item has a button to mark "Attempted"
      - When marked, a form allows the user to add a description and image of the attempt before saving the activity to the Attempted List
- Activity Log
    - Home page- max of 5, titles only
    - "Show all" button brings the user to the Activity Log view
        - Each item in this view has Name, Category, Description, Image, and Accessibility
            - Edit and Delete

# User Stories

As a busy person, I want to be provided with some new ideas I haven't thought of so I can easily try new activities.

As a friend, I want to save new ideas in one place so I can share them later with my friends.

As an adventurous person, I want to reflect on the new things I've tried so I can compare them, revisit memories, and learn about what I enjoy.
